Machine Learning Internship Session 1
Color Conversion - Coding Sheet

Python is a case sensitive language and proper indentation should be followed while programming

```python
#Importing Libraries

import cv2
import numpy as np

cap = cv2.VideoCapture(1) #Assign the camera to open
cap.set(3, 640) # set video width
cap.set(4, 480) # set video height

while (1) :#Program Main Loop

    ret, img = cap.read() #read the frame from camera

    cv2.imshow('img',img) #Open the output window for displaying image

    k=cv2.waitKey(30) #delay for 30 millseconds after reading the each frame
    if k == ord('q'):# break condition
        break

cap.release()#releasing the opened camera
cv2.destroyAllWindows()#close the windows opened by cv
```
